iConnect® Access

Universal viewing and image sharing in a single solution

$1.5 millon.

A recent survey said this is the overall average amount of annual revenue a single, full-time equivalent referring physician generates for their hospital.

Patients are imaged in multiple locations and their images need to follow them to the point of care so they are available to the referring physician. Providing this flexibility requires a tool that enables a physician to view images as well as share images. Because the majority of physicians are using EHRs, inside and outside the hospital, with PCs and mobile devices, the physician needs access to all of a patient's images — inside the EHR workflow — anywhere, any time.

Now they can.

How We Help You

Whether an exam is coming from a referring site or is on a CD, iConnect Access allows institutions and patients to share images and enables referring physicians to view those images from any browser-based device with no software download. With 2014 Modular certification for Meaningful Use Stage 2 (MU2), iConnect Access empowers physicians to meet MU2 imaging requirements and enhance their workflow so you can expand your referral network and reduce IT support.

MERGE
An IBM® Company

amplify your imaging value™

iConnect Access

is a zero-download, DICOM, XDS viewer and image sharing platform for referring physicians to review images from any browser-based device whenever, wherever needed. Physicians, staff, technologists and IT are empowered to quickly and securely move images so that they are available at the point of care. With iConnect Access you can...

Provide images for referring physicians from any browser-based device so you can grow your referral business

Reduce IT costs with a zero-download viewer and manage users through active directory or LDAP

Embed a link to iConnect Access within an EHR or hospital HIS to gain immediate access to all images

Exchange images to provide a more complete patient record

Reduce duplicate and often unreimbursable exams that increase patient radiation dosage

Merge Interoperability Solution Suite

iConnect® Enterprise Archive
A vendor neutral archive (VNA) to create an enterprise imaging strategy.

iConnect® Access Universal Viewer*
A zero-download, diagnostic quality image and XDS viewer for referring physicians.

iConnect® Access Image Sharing
Limited-license module to efficiently view and share DICOM, non-DICOM and relevant prior images and upload CDs.

iConnect® Network
An advanced imaging network that enables the exchange of imaging information electronically to meet MU2.

iConnect® Cloud Archive
A cloud-based image storage and management solution.

*iConnect Access is not FDA-cleared for diagnosticuse on mobile devices.

Merge Interoperability Solutions

The iConnect Enterprise Clinical Platform is the only comprehensive solution for collecting, archiving, viewing, sharing and exchanging images – anywhere, any time – and enables enterprise imaging to reduce or eliminate barriers in healthcare efficiency. True interoperable image exchange is a key component to deliver secure and timely access to patient information regardless of location and affiliation. This reduction in time and cost is beneficial to healthcare providers, physicians and patients.

With iConnect, you can leverage existing applications and widely-used web and healthcare technology standards and to create a vendor-neutral interoperable environment. Providers and physicians benefit from the platform's scalability, from simple image viewing to enterprise-level management and integration of diverse image sources and applications.

This EHR Module is 2014 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.

iConnect Access v5.0 Holds Certificate No. 02072014-2019-6; Date Certified: 02/07/2014; Effective Date: 2014 Edition. Modules Tested: 170.314(a)(12); 170.314(g)(1, 4). No Clinical Quality Measures tested. No additional software used.

Licensing and implementation of the functionality and content covered by this certification will require ongoing and/or one-time license and/or service fees covering the right to use the in-scope solutions, support, and requested standard implementation, integration, and consulting services. Interface implementation will require one-time costs and/or ongoing service fees. An upgrade to iConnect Access v5.0 is available to all existing iConnect Access customers with an extended Maintenance Agreement at no additional charge specifically due to this new feature. An additional cost will be required for Interface Engine Mirth for some of the functionality required to meet Meaningful Use measures.
